TOMORROW

VENTURI SCRUBBER SYSTEM

LNS-SC-VEN

High-Energy Particulate, Mist & Aerosol Control

Rugged, high-performance gas cleaning system designed for demanding industrial applications. The LNS-SC-VEN combines efficient particulate removal with reliable operation to help create a cleaner, healthier and more sustainable future.

High-efficiency
dust and fine
particulate removal

Efficient gas-liquid
impaction at
Venturi throat

Excellent acid mist
and aerosol capture

Optional chemical
scrubbing for
combined duties

Suitable for sticky
particulate and
high dust loading

Corrosion-resistant
construction
options

TYPICAL APPLICATIONS

Metallurgy & Foundries

Chemical & Fertilizer Plants

Mineral Processing

Incineration & Waste-to-Energy

Battery & Surface Treatment

Drying & Process Exhaust

HOW IT WORKS

Gas enters the converging section, accelerates through the throat, scrubbing liquid is atomized at high velocity, particles are captured, and clean gas exits after droplet separation.

**Cleaner Air. Healthier Industry.
Greener Tomorrow.**
