1) OVERVIEW / PRODUCT DESCRIPTION

The LINESiG LNS-DZ-PDD Dosing Skid System provides accurate, positive-displacement dosing for corrosive, hazardous and treatment chemicals across water treatment, petrochemical, hydrocarbon, terminal, utility and industrial applications. Designed for leak-free dosing, stable metering and continuous operation, the system ensures precise chemical delivery with high reliability and independent control for each pump train.

2) TECHNICAL SPECIFICATIONS

Service	Chemical dosing, additive injection & treatment chemical feed
Typical Duty	Accurate metering of corrosive, hazardous and treatment chemicals
Suitable Media	Acids, caustics, hypochlorite, coagulants, antiscalants, corrosion inhibitors, treatment chemicals and selected hydrocarbons
Pump Arrangement	2 working + 1 standby diaphragm metering pumps
Typical Flow Range	Project specific (e.g. 10 – 1500 L/h per pump)
Typical Pressure Range	Project specific (e.g. 4 – 16 bar)
Pump Control	Individual pump control (VFD / stroke length)
Materials of Construction	PP / PVDF / SS316 (depending on media) or project specific
Instrumentation	Calibration column, pulsation dampener, pressure gauges / transmitters, relief valve, flow indicator (each dosing line)
Skid Finish	Painted carbon steel with protective coating (SS optional)

3) PROCESS / SKID CONFIGURATION

- Positive-displacement diaphragm pumps with individual dosing lines.
- Common suction manifold or chemical day tank connection.
- Calibration column for easy flow verification.
- Pulsation dampener for smooth, low-pulsation flow.
- Pressure relief / back-pressure arrangement for safe operation.
- Compact, modular skid design for easy installation and maintenance.

4) KEY FEATURES

- Accurate and repeatable chemical metering.
- Leak-free diaphragm head design.
- Corrosion-resistant wetted parts for aggressive chemicals.
- Easy capacity adjustment (manual or automatic).
- Safe chemical handling with integral relief and isolation valves.
- Reliable continuous duty operation.
- Modular skid layout with flexible configuration.

5) APPLICATIONS

- Water treatment plants
- Chemical dosing packages
- Refinery and petrochemical chemical feed systems
- Utilities and power generation
- Storage terminals and tank farms
- Neutralization and pH control systems
- Hydrocarbon additive injection

6) NOTES / OPTIONS

- PLC / HMI integration with local or remote control.
- Double diaphragm with leak detection.
- Local control panel with instrumentation.
- Calibration column (glass or acrylic).
- Duplex materials (e.g. Hastelloy, Titanium) on request.
- ESD integration and permissives.
- Customized instrumentation, materials and configurations available.
