LOW FLOW
REPEATABLE

1) OVERVIEW / PRODUCT DESCRIPTION

The LINESIG LNS-DZ-PDG Dosing Skid System provides pulse-minimized, high-accuracy low-flow dosing for additives, catalysts, solvents, specialty chemicals and selected hydrocarbon streams. The system is designed for precise blending and controlled chemical injection, delivering reliable, repeatable dosing in demanding industrial applications.

2) TECHNICAL SPECIFICATIONS

Service	Chemical dosing, additive injection, precise blending & transfer
Typical Duty	Very low-flow, high-accuracy dosing for specialty chemicals
Suitable Media	Additives, catalysts, solvents, lube-oil additives, specialty chemicals and selected hydrocarbons
Pump Arrangement	Precision micro gear pumps (multiple pumps) on modular skid
Typical Flow Range	Project specific (e.g. 0.1 – 250 L/h per pump)
Typical Pressure Range	Project specific (e.g. 2 – 20 bar)
Pump Control	VFD or servo drive with precise speed control
Materials of Construction	Stainless steel 316 (SS316) or alloy as required
Instrumentation	High-accuracy flowmeter, pressure transmitter, fine control valve (on each dosing line)
Skid Finish	Cream / off-white, industrial coating, corrosion resistant

3) PROCESS / SKID CONFIGURATION

- Low-flow precision micro gear pumps with individual metering lines.
- Compact suction manifold with isolation valves and filtration (optional).
- High-accuracy flow verification using precision flowmeters.
- Fine control and injection valves for stable dosing.
- Compact and modular skid layout for specialty dosing duties.
- Designed for continuous, reliable operation.

4) KEY FEATURES

- Excellent low-flow accuracy and repeatability.
- Pulse-minimized dosing for smooth, stable injection.
- Accurate additive, catalyst and solvent injection.
- Compact and modular skid design.
- Suitable for precision blending and specialty chemical dosing.
- Easy automation and integration.
- Clean, reliable and serviceable design.

5) APPLICATIONS

- Fuel additive dosing systems.
- Lube and lubricant additive systems.
- Catalyst and solvent feed.
- Specialty chemical blending.
- Laboratory or pilot plant dosing.
- Hydrocarbon additive injection.

6) NOTES / OPTIONS

- PLC / HMI integration with local or remote control.
- Servo or VFD drive control for precise dosing.
- Compact control panel with operator interface.
- Mass-flow meter feedback (Coriolis or thermal) – optional.
- Heated or jacketed pumps and lines – optional.
- SS316, duplex or alloy execution – optional.
- Customized instruments, materials and configurations available.
