CUSTOMIZABLE

1) OVERVIEW / PRODUCT DESCRIPTION

The LINESIG LNS-DZ-PDP Dosing Skid System is designed for accurate, high-pressure positive-displacement dosing and injection of chemicals, solvents, methanol, corrosion inhibitors and hydrocarbon additives. It is engineered for reliable operation in oil & gas, petrochemical, refinery, utility and industrial applications, providing precise chemical delivery with independent metering and control on each pump.

2) TECHNICAL SPECIFICATIONS

Service	High-pressure chemical dosing, injection & process treatment
Typical Duty	Continuous dosing, injection and additive metering
Suitable Media	Methanol, glycols, corrosion inhibitors, catalyst solutions, additives, treatment chemicals and selected hydrocarbons
Pump Arrangement	2 working + 1 standby piston / plunger pumps
Typical Flow Range	Project specific (e.g. 5 – 500 L/h per pump)
Typical Pressure Range	Project specific (e.g. 10 – 200 bar)
Pump Control	Stroke length adjustment (manual or electric), VFD (optional)
Materials of Construction	SS316, duplex or alloy (e.g. Hastelloy) on request
Instrumentation	Pulsation dampener, relief valve, pressure indicator / transmitter, flow verification, isolation valves
Skid Finish	Epoxy coated carbon steel with protective coating (SS optional)

3) PROCESS / SKID CONFIGURATION

- High-pressure positive-displacement piston / plunger pumps with individual injection lines.
- Common suction manifold or day tank connection with strainer.
- Pulsation dampeners, pressure relief valves and isolation valves.
- Compact and robust skid layout with integral piping, instrumentation and local control panel.
- Designed for continuous injection duty in demanding environments.

4) KEY FEATURES

- Accurate high-pressure metering and injection.
- Rugged plunger drive for long service life.
- Repeatable and precise flow control.
- Suitable for high-pressure hydrocarbon injection.
- Modular skid design for easy installation.
- Easy maintenance and access.
- Industrial outdoor-duty execution.

5) APPLICATIONS

- Refinery additive injection.
- Pipeline chemical injection.
- Tank farm dosing.
- Hydrocarbon blending additives.
- Utilities and boiler chemical dosing.
- General industrial high-pressure dosing.

6) NOTES / OPTIONS

- PLC / HMI integration with local or remote control.
- VFD or electric stroke control (as required).
- Pressure relief and back-pressure arrangement.
- Local control panel with indication and alarms.
- Exotic wetted materials (e.g. Hastelloy, Inconel, Monel).
- ESD integration and permissives.
- Customized skid configurations, materials and instrumentation available.
